ning of each regular issue of the PCT Gazette.

(54) Title: ASPHALT SURFACE TREATMENT

(57) Abstract: A method and composition for treating a weathered low traffic volume asphalt surface. The method comprising the steps of providing a composition comprising a solution, emulsion or dispersion of a polymer material, particulate material, rheology modifiers, processing aids, and UV absorbers, wherein the composition is essentially free of bituminous components and is essentially free of cement; and applying the composition to the asphalt surface. The composition preferably is a shear thinning formulation which exhibits a marked reduction in viscosity when sprayed or otherwise subjected to shear during application but increases in viscosity after application.
